## Opening MicroVault® packaging

**STEP 1**  
**Inspect outer packaging.**  
**Check expiration date.**  
**Check that you have the right drug and the right dose.**

**STEP 2**  
**Open at the perforated line.**  
**Hold tube and cap upright at a 45-degree angle.**  
**Twist to open until seal is broken.**

**STEP 3**  
**Pull cap straight away from tube.**

**STEP 4**  
**Visually inspect the syringe prior to administration.**

## Simplist® syringe use

**STEP 1**  
**Twist off the syringe tip cap.**  
Helpful hint: Before removing the cap, priming the syringe may be easier if you push the plunger rod forward with the tip cap on in order to break the seal.

**STEP 2**  
**Prime the syringe by expelling the air bubble.**  
**Adjust the dose if applicable.**

**STEP 3**  
**Administer dose. Do not leave syringe unattended. Discard syringe into appropriate receptacle.**  
Helpful hint: If clinically appropriate, according to the package insert, attach a needle per institutional guidelines.
